Achieving Continuous Compliance in DevOps Programs

— Arun Prabhakar

Accomplishing Continuous Compliance → Compliance is not a "one-and-done" activity

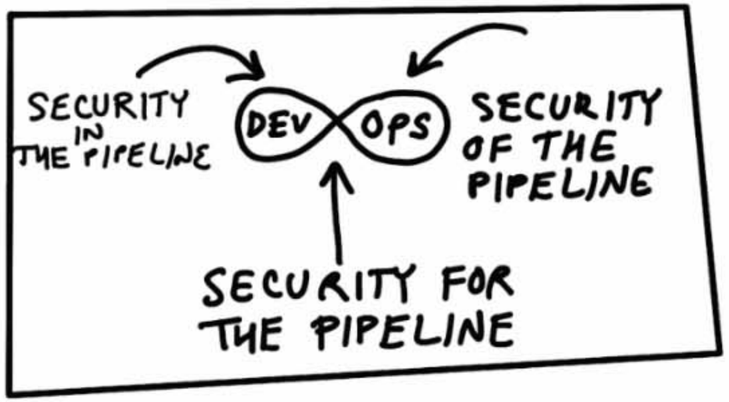
Compliance as code

Scripts live with code — process as code

Continuous



Security Champions

White Team — Functional Strategy

Purple Team — Technical Excellence

Bridge builders between offensive + defensive teams

Optimizing security teams

CODE-ifying security: incorporate security into your tools + code

Multiple roles needed

Dev teams

Security architect

Infrastructure engineer

Business requirements → Security requirements

Starting point for continuous compliance
