Software Engineering Institute

Carnegie Mellon University
4500 Fifth Avenue
Pittsburgh, PA 15213-3890
Phone: 412-268-5800
Fax: 412-268-6257

What will this course help you do?

The two-and-a-half-day CMMI Level 2 for Practitioners course assists practitioners in achieving their CMMI maturity level 2 goals. A follow-on to the Introduction to CMMI v1.2 course, this new course gives you a deeper understanding of maturity level 2 practices and the purpose behind them. CMMI Level 2 for Practitioners is an excellent way to learn more about CMMI maturity level 2, to assist them in guiding an organization's process improvement efforts, and to prepare people in an organization for a SCAMPI appraisal or to be a SCAMPI appraisal team member.

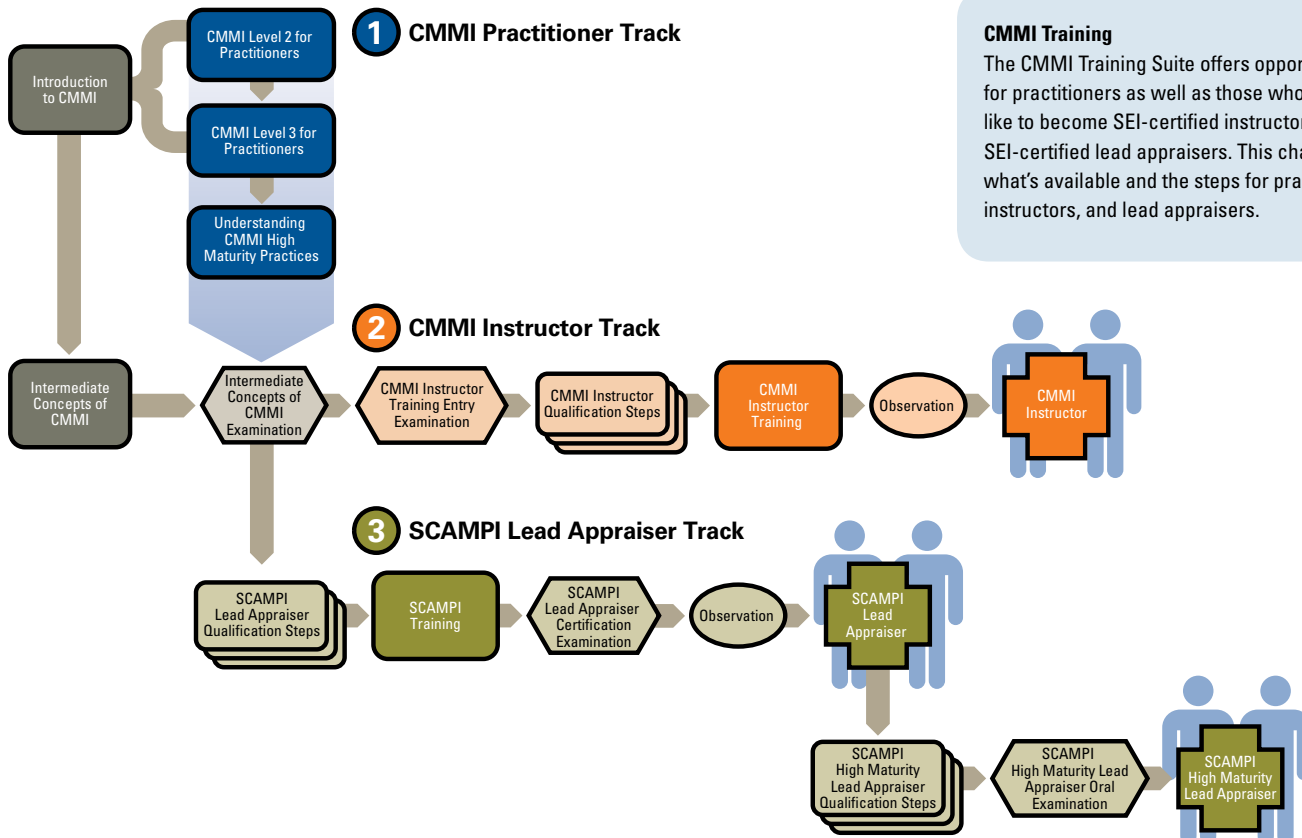

Some specific skills students will develop include the following:

- understanding the interrelationships among model components (e.g., practices, goals, and process areas)
- interpreting CMMI practices at maturity level 2
- applying CMMI models to improve processes in organizations
- applying CMMI models to appraise processes in organizations

Why should you attend this course?

Unlike any other course in the suite of SEI process improvement courses, CMMI Level 2 for Practitioners is a response to a specific need the SEI has seen in the CMMI community. It offers training that is one step beyond the Introduction to CMMI course and is designed to help you achieve maturity level 2.

Roadmap for CMMI Professionals

CMMI Training
The CMMI Training Suite offers opportunities for practitioners as well as those who would like to become SEI-certified instructors and SEI-certified lead appraisers. This chart shows what's available and the steps for practitioners, instructors, and lead appraisers.
